Review report of the Independent Auditor

To the Shareholders of Arabian Scandinavian Insurance Company (PLC) - Takaful - ASCANA Insurance

Introduction

We have reviewed the accompanying condensed interim statement of financial position of Arabian Scandinavian Insurance Company (PLC) - Takaful - ASCANA Insurance (the "Company") as at 31 March 2023, and the related condensed interim income statement and condensed interim statement of comprehensive income for the three months period then ended, condensed interim statement of changes in equity, condensed interim statement of cash flows for the three months period then ended and other related explanatory notes. Management is responsible for the preparation and presentation of this condensed interim financial information in accordance with International Accounting Standard 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on this condensed interim financial information based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim financial information is not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting".

GRANT THORNTON

Notes to the condensed interim financial information For the period ended 31 March 2023

1 Legal status and activities

Arabian Scandinavian Insurance Company PLC - Takaful - ASCANA Insurance (the "Company") is a public shareholding company and was registered in 1992. The Company is engaged in takaful and retakaful of all classes of business in accordance with the provisions of the United Arab Emirates ("UAE") Federal Law No. 6 of 2007, concerning Financial Regulations of Insurance Companies issued by the Central Bank of United Arab Emirates and regulation of its operations.

The Shareholders Extraordinary General Assembly Meeting held on 19 March 2014 approved conversion of the Company's business from conventional insurance to Takaful insurance. The Board of Directors appointed a Fatwa and Sharia'a Supervisory Board for overseeing the compliance with Sharia'a.

The Company started issuing short term takaful contracts from 1 February 2015 in connection with life and non-life takaful such as motor, marine, fire, engineering, medical and general accident risks (collectively known as general takaful) and the name of the Company was changed to Arabian Scandinavian Insurance Company PLC - Takaful ASCANA Insurance. The Company only operates in UAE, through its Dubai and Abu Dhabi offices.

This condensed interim financial information has been prepared in accordance with the requirements of the applicable laws and regulations, including UAE Federal Law No. (32) of 2021.

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree-Law No.47 of 2022 on the Taxation of Corporations and Businesses which will be effective for tax periods commencing on or after 1 June 2023. There is no impact of this announcement on the financial statements of the Company for the year ended 31 December 2022. Management will assess the implications of this Federal Corporate Tax in due course.

The address of the Company's registered office is P.O. Box 1993, Dubai, United Arab Emirates.

2 Basis of preparation

The condensed interim financial information are for the three months period ended 31 March 2023 and are presented in United Arab Emirate Dirham (AED), which is also the functional currency of the Company. The condensed interim financial information has been prepared in accordance with IAS 34 'Interim Financial Reporting' and do not include all of the information required in annual financial statements in accordance with IFRSs, and should be read in conjunction with the financial statements of the Company for the year ended 31 December 2022. Further, results for interim periods are not necessarily indicative of the results that may be expected for the financial year ending 31 December 2023.

While applying the requirements of International Financial Reporting Standards 17 Insurance Contracts (IFRS 17), the Company has not considered shareholders' expenses in IFRS 17 assessment in line with Article 3.3 of Section 7 of the Financial Regulations for Takaful Companies (FRTC) and the relevant Shariah Board decisions. Further, in line with requirements of FRTC, the Company has only considered a fixed Wakala fee while applying the requirement of IFRS 17. Policy acquisition cost and general and administrative expenses accounts along with associated balance sheet items are part of the shareholders' accounts and presented separately.

3 Significant accounting policies

The accounting policies, critical accounting judgments and key source of estimation used in the preparation of this condensed interim financial information are consistent with those used in the audited financial statements for the year ended 31 December 2022, except for application of new standards effective as of 1 January 2023 and several amendments and interpretations apply for the first time in 2023.

The Company has not early adopted any standard, interpretation or amendment that has been issued but not yet effective.

Notes to the condensed interim financial information For the period ended 31 March 2023

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS

IFRS 17 (FAS 42 and FAS 43) Insurance Contracts

IFRS 17 (FAS 42 and FAS 43) establishes principles for the recognition, measurement, presentation and disclosure of takaful contracts, re takaful contracts and investment contracts with discretionary participation features. It introduces a model that measures groups of contracts based on the Company's estimates of the present value of future cash flows that are expected to arise as the Company fulfils the contracts, an explicit risk adjustment for non-financial risk and a contractual service margin.

Under IFRS 17 (FAS 42 and FAS 43), takaful revenue in each reporting period represents the changes in the liabilities for remaining coverage that relate to services for which the Company expects to receive consideration and an allocation of contributions that relate to recovering insurance acquisition cash flows. In addition, investment components are no longer included in insurance revenue and insurance service expenses.

IFRS 17 (FAS 42 and FAS 43) replaces IFRS 4 Insurance Contracts for annual periods on or after 1 January 2023. The Company has restated comparative information applying the transitional provisions to IFRS 17 (FAS 42 and FAS 43). The nature of the changes in accounting policies can be summarised, as follows:

Changes to classification and measurement

The adoption of IFRS 17 (FAS 42 and FAS 43) did not change the classification of the Company's takaful contracts. The Company was previously permitted under IFRS 4 to continue accounting using its previous accounting policies. However, IFRS 17 (FAS 42 and FAS 43) establishes specific principles for the recognition and measurement of takaful contracts issued and retakaful contracts held by the Company.

Under IFRS 17, the Company's takaful contracts issued, and retakaful contracts held are all eligible to be measured by applying the premium allocation approach (PAA). The PAA simplifies the measurement of takaful contracts in comparison with the general model in IFRS 17 (FAS 42 and FAS 43).

The Company applies the PAA to simplify the measurement of all of its Takaful and retakaful contracts. When measuring liabilities for remaining coverage, the PAA is similar to the Company's previous accounting treatment. However, when measuring liabilities for outstanding claims, the Company now discounts the future cash flows (unless they are expected to occur in one year or less from the date on which the claims are incurred) and includes an explicit risk adjustment for non-financial risk.

Income and expenses from retakaful contracts other than insurance finance income and expenses are now presented as a single net amount in profit or loss. Previously, amounts recovered from reinsurers and reinsurance expenses were presented separately.

The measurement principles of the PAA differ from the 'earned premium approach' used by the Company under IFRS 4 in the following key areas:

- The liability for remaining coverage reflects contributions received less deferred acquisition expenses less amounts recognised in revenue for insurance services provided;
- Measurement of the liability for remaining coverage includes an adjustment for the time value of
 money and the effect of financial risk where the premium due date and the related period of coverage
 are more than 12 months apart;
- Measurement of the liability for remaining coverage involves an explicit evaluation of risk adjustment
 for non-financial risk when a group of contracts is onerous in order to calculate a loss component
 (previously these may have formed part of the unexpired risk reserve provision); and
- Measurement of the liability for incurred claims (previously claims outstanding and incurred-but-notreported (IBNR) is determined on a discounted probability-weighted expected value basis and includes an explicit risk adjustment for non-financial risk.

Notes to the condensed interim financial information For the period ended 31 March 2023

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 (FAS 42 and FAS 43) Insurance Contracts (continued)

Changes to presentation and disclosure

For presentation in the condensed interim statement of financial position, the Company aggregates Takaful and retakaful contracts issued and retakaful contracts held, respectively and presents separately:

- Groups of Takaful and retakaful contracts issued that are assets;
- Groups of Takaful and retakaful contracts issued that are liabilities;
- Groups of retakaful contracts held that are assets; and
- Groups of retakaful contracts held that are liabilities.

The groups referred to above are those established at initial recognition in accordance with the IFRS 17 (FAS 42 and FAS 43) requirements.

The line item descriptions in the condensed interim statement of profit or loss and condensed interim other comprehensive income have been changed significantly compared with last year. Previously, the Company reported the following line items:

- · Gross written contributions
- · Net written contributions
- · Changes in contribution reserves
- Gross insurance claims
- · Net insurance claims

Instead, IFRS 17 (FAS 42 and FAS 43) requires separate presentation of:

- Insurance revenue
- · Insurance service expenses
- Insurance finance income or expenses
- · Income or expenses from retakaful contracts held

The Company provides disaggregated qualitative and quantitative information about:

- Amounts recognised in its financial statements from takaful contracts
- Significant judgements, and changes in those judgements, when applying the standard

Transition

Changes in accounting policies resulting from the adoption of IFRS 17 (FAS 42 and FAS 43) have been applied using a full retrospective approach to the extent practicable. Under the full retrospective approach, at 1 January 2022 the Company:

- identified, recognised and measured each group of Takaful and retakaful contracts as if IFRS 17 (FAS 42 and FAS 43) had always been applied;
- identified, recognised and measured any assets for insurance acquisition cash flows as if IFRS 17 (FAS 42 and FAS 43) had always been applied;
- derecognised previously reported balances that would not have existed if IFRS 17 (FAS 42 and FAS 43) had always been applied. These included takaful receivables and payables, and provisions for levies that are attributable to existing takaful contracts. Under IFRS 17 (FAS 42 and FAS 43), they are included in the measurement of the takaful contracts; and
- recognised any resulting net difference in equity.

The Company has applied the transition provisions in IFRS 17 (FAS 42 and FAS 43) and has not disclosed the impact of the adoption of IFRS 17 (FAS 42 and FAS 43) on each condensed interim financial information line item and EPS. The effects of adopting IFRS 17 (FAS 42 and FAS 43) on the condensed interim financial information at 1 January 2022 are presented in the condensed interim statement of changes in equity.

Notes to the condensed interim financial information For the period ended 31 March 2023

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 (FAS 42 and FAS 43) Insurance Contracts (continued)

Takaful and retakaful contracts classification

The Company issues takaful contracts in the normal course of business, under which it accepts significant takaful risk from its policyholders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits payable after an insured event with benefits payable if the insured event did not occur. Takaful contracts can also transfer financial risk.

Takaful and retakaful contracts accounting treatment

Separating components from Takaful and retakaful contracts

The Company assesses its takaful and retakaful products to determine whether they contain distinct components which must be accounted for under another IFRS instead of under IFRS 17 (FAS 42 and FAS 43).

Some retakaful contracts issued contain profit commission arrangements. Under these arrangements, there is a minimum guaranteed amount that the policyholder will always receive – either in the form of profit commission, or as claims, or another contractual payment irrespective of the insured event happening. The minimum guaranteed amounts have been assessed to be highly interrelated with the insurance component of the retakaful contracts and are, therefore, non-distinct investment components which are not accounted for separately.

Level of aggregation

IFRS 17 (FAS 42 and FAS 43) requires a company to determine the level of aggregation for applying its requirements. The Company previously applied aggregation levels under IFRS 4, which were significantly higher than the level of aggregation required by IFRS 17 (FAS 42 and FAS 43). The level of aggregation for the Company is determined firstly by dividing the business written into portfolios. Portfolios comprise groups of contracts with similar risks which are managed together. Portfolios are further divided based on expected profitability at inception into two categories: onerous contracts and others. This means that, for determining the level of aggregation, the Company identifies a contract as the smallest 'unit', i.e., the lowest common denominator. However, the Company makes an evaluation of whether a series of contracts need to be treated together as one unit based on reasonable and supportable information, or whether a single contract contains components that need to be separated and treated as if they were stand-alone contracts. As such, what is treated as a contract for accounting purposes may differ from what is considered as a contract for other purposes (i.e., legal or management). IFRS 17 (FAS 42 and FAS 43) also notes that no group for level of aggregation purposes may contain contracts issued more than one year apart.

The Company has elected to group together those contracts that would fall into different groups only because law, regulation or internal policies specifically constrains its practical ability to set a different price or level of benefits for policyholders with different characteristics. The Company applied a full retrospective approach for transition to IFRS 17 (FAS 42 and FAS 43). The portfolios are further divided into groups of contracts by quarter of issue and profitability for recognition and measurement purposes. Hence, within each quarter of issue, portfolios of contracts are divided into two groups, as follows:

- A group of contracts that are onerous at initial recognition (if any)
- A group of the remaining contracts in the portfolio (if any)

The profitability of groups of contracts is assessed by IFRS 17 committee that take into consideration existing and new business. The Company assumes that no contracts in the portfolio are onerous at initial recognition unless facts and circumstances indicate otherwise. For contracts that are not onerous, the Company assesses, at initial recognition, that there is no significant possibility of becoming onerous subsequently by assessing the likelihood of changes in applicable facts and circumstances.

Notes to the condensed interim financial information For the period ended 31 March 2023

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 (FAS 42 and FAS 43) Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Level of aggregation (continued)

The Company has a IFRS 17 Committee that meets at regular intervals to determine the profitability groupings of each portfolio of contracts. The committee acts as a forum to collect input from the pricing and underwriting functions and assess the relevant facts and circumstances which indicate that groups of contracts are onerous at initial recognition.

Below are some of the relevant facts and circumstances that the Company considers:

- Evaluation of expected combines ratios;
- Pricing information;
- Results of similar contracts it has recognised; and
- · Environment factors, e.g., a change in market experience or regulations.

The Company divides portfolios of retakaful contracts held applying the same principles set out above, except that the references to onerous contracts refer to contracts on which there is a net gain on initial recognition. For some groups of retakaful contracts held, a group can comprise a single contract.

Recognition

The Company recognises groups of takaful contracts it issues from the earliest of the following:

- The beginning of the coverage period of the group of contracts;
- The date when the first payment from a policyholder in the group is due or when the first payment is received if there is no due date;
- For a group of onerous contracts, if facts and circumstances indicate that the group is onerous the Company recognises a group of retakaful contracts held:
- If the retakaful contracts provide proportionate coverage at the later of the beginning of the coverage period of the group, or the initial recognition of any underlying contract; and
- In all other cases, from the beginning of the coverage period of the group the Company adds new
 contracts to the group when they are issued or initiated.

Contract boundary

The Company includes in the measurement of a group of takaful contracts all the future cash flows within the boundary of each contract in the group. Cash flows are within the boundary of an insurance contract if they arise from substantive rights and obligations that exist during the reporting period in which the Company can compel the policyholder to pay the contributions, or in which the Company has a substantive obligation to provide the policyholder with services. A substantive obligation to provide services ends when:

The Company has the practical ability to reassess the risks of the particular policyholder and, as a
result, can set a price or level of benefits that fully reflects those risks; or

Both of the following criteria are satisfied:

- The Company has the practical ability to reassess the risks of the portfolio of takaful contracts that
 contain the contract and, as a result, can set a price or level of benefits that fully reflects the risk of
 that portfolio; and
- The pricing of the contributions for coverage up to the date when the risks are reassessed does not take into account the risks that relate to periods after the reassessment date.

A liability or asset relating to expected contributions or claims outside the boundary of the insurance contract is not recognised. Such amounts relate to future takaful contracts.

Notes to the condensed interim financial information For the period ended 31 March 2023

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 (FAS 42 and FAS 43) Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Measurement - Premium Allocation Approach

Takaful contracts - initial measurement

The Company applies the premium allocation approach (PAA) to all the takaful contracts that it issues and retakaful contracts that it holds, as:

• The coverage period of each contract in the group is one year or less, including coverage arising from all contributions within the contract boundary.

Or

For contracts longer than one year, the Company has modelled possible future scenarios and
reasonably expects that the measurement of the liability for remaining coverage for the group
containing those contracts under the PAA does not differ materially from the measurement that would
be produced applying the general model. In assessing materiality, the Company has also considered
qualitative factors such as the nature of the risk and types of its lines of business.

For a group of contracts that is not onerous at initial recognition, the Company measures the liability for remaining coverage as the contributions, if any, received at initial recognition, minus any insurance acquisition cash flows at that date, There is no allowance for time value of money as the contributions are mostly received within one year of the coverage period.

The Company measures its reinsurance assets for a group of retakaful contracts that it holds on the same basis as takaful contracts that it issues, however, adapted to reflect the features of retakaful contracts held that differ from takaful contracts issued, for example the generation of expenses or reduction in expenses rather than revenue.

Takaful contracts - subsequent measurement

The Company measures the carrying amount of the liability for remaining coverage at the end of each reporting period as the liability for remaining coverage at the beginning of the period:

- · Plus contributions received in the period;
- · Minus capitalised insurance acquisition cash flows;
- Plus any amounts relating to the amortisation of the acquisition cash flows recognised as an expense in the reporting period for the group;
- · Plus any adjustment to the financing component, where applicable;
- Minus the amount recognised as insurance revenue for the coverage period; and
- Minus any investment component paid or transferred to the liability for incurred claims.

The Company estimates the liability for incurred claims as the fulfilment cash flows related to incurred claims. The fulfilment cash flows incorporate, in an unbiased way, all reasonable and supportable information available without undue cost or effort about the amount, timing and uncertainty of those future cash flows, they reflect current estimates from the perspective of the entity, and include an explicit adjustment for non-financial risk (the risk adjustment). The Company does not adjust the future cash flows for the time value of money and the effect of financial risk for the measurement of liability for incurred claims that are expected to be paid within one year of being incurred.

Notes to the condensed interim financial information For the period ended 31 March 2023

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 (FAS 42 and FAS 43) Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Retakaful contracts

The subsequent measurement of retakaful contracts held follows the same principles as those for takaful contracts issued and has been adapted to reflect the specific features of reinsurance held.

Takaful contracts - modification and derecognition

The Company derecognises takaful contracts when:

 The rights and obligations relating to the contract are extinguished (i.e., discharged, cancelled or expired);

Or

The contract is modified such that the modification results in a change in the measurement model or
the applicable standard for measuring a component of the contract, substantially changes the contract
boundary, or requires the modified contract to be included in a different group. In such cases, the
Company derecognises the initial contract and recognises the modified contract as a new contract.

When a modification is not treated as a derecognition, the Company recognises amounts paid or received for the modification with the contract as an adjustment to the relevant liability for remaining coverage.

Presentation

The Company has presented separately, in the statement of financial position, the carrying amount of groups of takaful contracts issued that are assets, groups of takaful contracts issued that are liabilities, retakaful contracts held that are assets and groups of retakaful contracts held that are liabilities.

Any assets or liabilities for insurance acquisition cash flows recognised before the corresponding takaful contracts are included in the carrying amount of the related groups of takaful contracts issued.

The Company disaggregates the total amount recognised in the statement of profit or loss and other comprehensive income into an insurance service result, comprising insurance revenue and insurance service expense, and insurance finance income or expenses.

The Company disaggregate the change in risk adjustment for non-financial risk between a financial and non-financial portion which will be presented in insurance finance income or expenses and in insurance service result respectively.

The Company separately presents income or expenses from retakaful contracts held from the expenses or income from takaful contracts issued.

Insurance revenue

The insurance revenue for the period is the amount of expected contribution receipts (excluding any investment component) allocated to the period. The Company allocates the expected contribution receipts to each period of coverage on the basis of the passage of time; but if the expected pattern of release of risk during the coverage period differs significantly from the passage of time, then on the basis of the expected timing of incurred insurance service expenses.

The Company changes the basis of allocation between the two methods above as necessary, if facts and circumstances change. The change is accounted for prospectively as a change in accounting estimate.

Notes to the condensed interim financial information For the period ended 31 March 2023

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 (FAS 42 and FAS 43) Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Loss components

The Company assumes that no contracts are onerous at initial recognition unless facts and circumstances indicate otherwise. If at any time during the coverage period, the facts and circumstances indicate that a group of takaful contracts is onerous, the Company establishes a loss component as the excess of the fulfilment cash flows that relate to the remaining coverage of the group over the carrying amount of the liability for remaining coverage of the group. Accordingly, by the end of the coverage period of the group of contracts the loss component will be zero.

Insurance finance income and expense

Insurance finance income or expenses comprise the change in the carrying amount of the group of takaful contracts arising from:

- The effect of the time value of money and changes in the time value of money; and
- The effect of financial risk and changes in financial risk.

The Company disaggregates insurance finance income or expenses in the profit or loss. The impact of changes in market interest rates on the value of the insurance assets and liabilities are reflected in the profit or loss.

Net income or expense from retakaful contracts held

The Company presents separately on the face of the statement of profit or loss, the amounts expected to be recovered from reinsurers, and an allocation of the reinsurance contributions paid. The Company treats reinsurance cash flows that are contingent on claims on the underlying contracts as part of the claims that are expected to be reimbursed under the reinsurance contract held.

4 Critical accounting estimates and judgments in applying accounting policies

Judgements and estimates

The preparation of this condensed interim financial information requires management to make judgements, estimates and assumptions that effect the application of accounting policies and the reported amounts of assets and liabilities, income, and expense. Actual results may differ from these estimates.

In preparing this condensed interim financial information, the significant judgements made by management in applying the accounting policies and the key sources of estimation uncertainty were the same as those that were applied in the audited financial statements as at and for the year ended 31 December 2022. Except for the below judgements.

Takaful and retakaful contracts

The Company applies the PAA to simplify the measurement of takaful contracts. When measuring liabilities for remaining coverage, the PAA is broadly similar to the Company's previous accounting treatment under IFRS 4. However, when measuring liabilities for incurred claims, the Company now discounts cash flows that are expected to occur more than one year after the date on which the claims are incurred and includes an explicit risk adjustment for non-financial risk.

Notes to the condensed interim financial information For the period ended 31 March 2023

4 Critical accounting estimates and judgments in applying accounting policies (continued)

Liability for remaining coverage

For insurance acquisition cash flows, the Company is eligible and chooses to capitalise all insurance acquisition cashflows upon payments.

The effect of recognising insurance acquisition cash flows as an expense on initial recognition of group of takaful contracts is to increase the liability for remaining coverage on initial recognition and reduce the likelihood of any subsequent onerous contract loss. There would be an increased charge to profit or loss on initial recognition, due to expensing acquisition cash flows, offset by an increase in profit released over the coverage period. For groups of contracts that are onerous, the liability for remaining coverage is determined by the fulfilment cash flows.

Liability for incurred claims

The ultimate cost of outstanding claims is estimated by using a range of standard actuarial claims projection techniques, such as Chain Ladder and Bornheutter-Ferguson methods.

The main assumption underlying these techniques is that a Company's past claims development experience can be used to project future claims development and hence ultimate claims costs. These methods extrapolate the development of paid and incurred losses, average costs per claim (including claims handling costs), and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by significant business lines and claim types. Large claims are usually separately addressed, either by being reserved at the face value of loss adjuster estimates or separately projected in order to reflect their future development. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based. Additional qualitative judgement is used to assess the extent to which past trends may not apply in future, (e.g., to reflect one-off occurrences, changes in external or market factors such as public attitudes to claiming, economic conditions, levels of claims inflation, judicial decisions and legislation, as well as internal factors such as portfolio mix, policy features and claims handling procedures) in order to arrive at the estimated ultimate cost of claims that present the probability weighted expected value outcome from the range of possible outcomes, taking account of all the uncertainties involved.

Other key circumstances affecting the reliability of assumptions include variation in interest rates, delays in settlement and changes in foreign currency exchange rates.

Discount rates

The Company use bottom-up approach to derive the discount rate. Under this approach, the discount rate is determined as the risk-free yield, adjusted for differences in liquidity characteristics between the financial assets used to derive the risk-free yield and the relevant liability cash flows (known as an 'illiquidity premium'). The risk-free rate was derived using swap rates available in the market denominated in the same currency as the product being measured. When swap rates are not available, highly liquid sovereign bonds with a AAA credit rating were used. Management uses judgment to assess liquidity characteristics of the liability cash flows.

Roll-forward of net asset or liability for takaful contracts issued showing the liability for remaining coverage and the liability for incurred claims

The Company disaggregates information to provide disclosure in respect of major product lines separately: Motor takaful, Medical and Group life, and General retakaful issued. This disaggregation has been determined based on how the company is managed.

The roll-forward of the net asset or liability for takaful contracts issued, showing the liability for remaining coverage and the liability for incurred claims, is disclosed in the table on the next page.

11 Statutory reserve

In accordance with the Company's Articles of Association and Article 241 of the Federal Law No. 32 of 2021, a minimum of 10% of the Company's annual net profits must be transferred to a non-distributable legal reserve. As per the Company's Articles of Association, such transfers are required until the balance in the legal reserve equals 50% of the Company's paid-up share capital. No transfer to the statutory reserve has been made during the three-month period ended 31 March 2023 (three-month period ended 31 March 2022: Nil), as this will be based on the audited results for the year end.

12 Retakaful reserve

In accordance with Article 34 of the Central Bank of UAE's Board of Directors Decision No. (23) of 2019, the Company allocated an amount equals to 0.5% of the total retakaful contributions ceded to retakaful reserve. No transfer to the retakaful reserve has been made during the three-month period ended 31 March 2023 (three-month period ended 31 March 2022: Nil), as this will be based on the audited results for the year end. This reserve is accumulated year after year and may not be disposed of without the written approval of the Director General of the Central Bank of United Arab Emirates.

17 Fair value measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair value of investments at amortised cost

Management considers that the carrying amounts of financial assets and financial liabilities recognised at amortised cost in the condensed interim financial information approximate their fair values except for financial investments measured at fair value through other comprehensive income of which fair value is determined based on the quoted market prices and disclosed in Note 5 of this condensed interim financial information.

Fair value of financial instruments carried at fair value

Valuation techniques and assumptions applied for the purposes of measuring fair value

The fair values of assets are determined using similar valuation techniques and assumptions as used in the audited annual financial statements for the year ended 31 December 2022.

Financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

The following table provides an analysis of financial and non-financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 the fair value of financial instruments traded in an active market is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the company is the current bid price. These instruments are included in Level 1.
- Level 2 the fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are unobservable, the instrument is included in Level 2.
- Level 3 if one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

Notes to the condensed interim financial information For the period ended 31 March 2023

17 Fair value measurements (continued)

Fair value of financial instruments carried at fair value (continued)

Valuation techniques and assumptions applied for the purposes of measuring fair value (continued)

- (a) Fair values have been determined by reference to their quoted prices at the reporting date.
- (b) The Company holds investments in unquoted securities of three entities as at 31 March 2023 (31 December 2022: three entities). These investments are fair valued based on Net Asset Value Techniques using observable market data. Management believes that there is no significant deterioration in the value of these unquoted investments during the period ended 31 March 2023. All the unquoted securities fall under level 3 of fair value hierarchy therefore use of estimate is significant.

18 Capital risk management

The solvency regulations identify the required Solvency Margin to be held in addition to takaful liabilities. The Solvency Margin (presented in the table below) must be maintained at all times throughout the period. The Company is subject to solvency regulations which it has complied with during the year. The Company has incorporated in its policies and procedures the necessary tests to ensure continuous and full compliance with such regulations.

The table below summarises the Minimum Capital Requirement, Minimum Guarantee Fund and Solvency Capital Requirement of the Company and the total capital held to meet these solvency margins as defined in the Regulations. In accordance with Circular No. CBUAE/BSD/N/2022/923 of CBUAE dated 28 February 2022, the Company has disclosed the solvency position for the immediately preceding period as the current year solvency position is not yet finalised.

	(Audited)
	31 December
	2022
	AED'000
Minimum Capital Requirement (MCR)	100,000
Solvency Capital Requirement (SCR)	41,170
Minimum Guarantee Fund (MGF)	25,692
Basic Own Funds	118,818
MCR Solvency Margin - Surplus	18,818
SCR Solvency Margin - Surplus	77,648
MGF Solvency Margin – Surplus	93,126

Based on the regulatory requirements, the minimum regulatory capital required is AED 100 million as at 31 March 2023 and 31 December 2022 against which the paid-up capital of the Company is AED 154 million.

19 Subsequent events

Subsequent to period end, Sukoon Insurance (formerly Oman Insurance Company P.S.C.) has obtained approvals from the Central Bank of UAE and Securities and Commodities Authority (SCA) to proceed with the acquisition of the majority of the shares of the Company. The existing board of directors have resigned on 19 April 2023 and general assembly meeting of shareholders will be held for the appointment of new board.

Except for what is disclosed above, there have been no events subsequent to the condensed interim statement of financial position date that would significantly affect the amounts reported in the condensed interim financial information as at and for the three month period ended 31 March 2023.
