Arabian Scandinavian Insurance Company (PLC) - Takaful - ASCANA Insurance

Financial statements for the year ended 31 December 2023

REPORT OF THE BOARD OF DIRECTORS FOR THE YEAR ENDED 31 DECEMBER 2023

Dear Shareholders,

We have the pleasure in presenting you the financial results of Arabian Scandinavian Insurance Company - Takaful - Ascana Insurance ("ASCANA") (the "Company") ("Sukoon Takaful") for the year ended 31 December 2023.

Reflecting on the year gone by, May 2023 opened a new chapter in the history of ASCANA, post-acquisition by Oman Insurance Company PJSC ("Sukoon"). This acquisition has realigned our strategic vision and has provided us with the necessary resources and support, leveraging Sukoon's strong heritage, market positioning and specialised underwriting capabilities as we embark on this transformative journey.

We immediately initiated a comprehensive assessment of our operations, identifying inefficiencies and devising strategic measures to enhance our operational efficacy. This endeavor led to a significant restructuring, optimising our resources, cost efficiencies and focusing on core competencies. Corrective actions have now been taken on the takaful portfolio along with solvency bolstering steps which includes the divestment of non-core assets. The effects of these actions will start resonating in our results positively in 2024.

In Q3 2023, we have received an 'A' (Stable) rating by S&P. This was followed by a rebrand of our company to **Sukoon Takaful**. aligning ourselves with our parent company's brand identity, further showcasing our Sharia-compliant takaful solutions under the larger Sukoon umbrella. This strategic branding not only bolsters our market presence and positioning but also paves the way for sustainable growth in the years to come as Sukoon Takaful aims to be a reference in the region in the takaful space.

Looking ahead to 2024, the transformation journey we have embarked on will continue with full momentum, where the strategic initiatives implemented this year will fully start delivering results. We are confident that the company is expected to turnaround by end of the financial year 2024 coupled with new product offerings expected to be launched during the same period.

Takaful revenue for the year ended 31 December 2023 has reached AED 126.6 million against AED 128.5 million in the last year.

Net loss attributable to shareholders revenue for the year ended 31 December 2023 has reached AED 76.5 million against the net loss of AED 30.7 million in the last year.

Participants loss for the year ended 31 December 2023 has reached AED 70.2 million against a loss of AED 40.97 million in the last year. This loss is predominantly pertaining to business written prior to 2H 2023. Post 2H 2023, pricing has been adequately adjusted and is now being closely monitored.

We would like to put on record our sincere appreciation and gratitude towards all stakeholders of Sukoon Takaful. We would also like to thank our management and staff of the company for their sincere and dedicated contribution to the successful growth of the Company.

May God; the Almighty; guide our steps.

On behalf of the Board, Saood Abdulaziz Al Ghurair Chairman 31 January 2024

Independent Auditor's Report

To the shareholders of Arabian Scandinavian Insurance Company (PLC) - Takaful - ASCANA Insurance

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Arabian Scandinavian Insurance Company (PLC) - Takaful - ASCANA Insurance (the "Company"), Dubai, United Arab Emirates which comprise the statement of financial position as at 31 December 2023, and the statement of profit or loss, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended and notes to the financial statements, including a summary of material accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2023, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with *International Ethics Standards Board for Accountant's Code of Ethics for Professional Accountants (IESBA Code)*, and we have fulfilled our other ethical responsibilities in accordance with these requirements and IESBA code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Report on the Audit of the Financial Statements (continued)

Key Audit Matters (continued)

Key Audit Matter	How our audit addressed the key audit matter
Valuation of (Re)takaful Contract Assets and Liabi	
 (Re)takaful contract liabilities and retakaful contract assets involves significant judgements and estimates particularly with respect to the eligibility of the premium allocation approach (PAA) model and estimation of the liabilities for incurred claims. These liabilities primarily include determination of expected premium receipts and expected ultimate cost of claims which are within the contract boundaries. The calculation for these liabilities includes significant estimation and involvement of actuarial experts in order to ensure appropriateness of methodology, assumptions and data used to determine the estimated future cash flows and the appropriateness of the discount rates used to determine the present value of these cashflows. 	 Our audit procedures in conjunction with our actuarial specialists, included: Understood and evaluated the process, the design of controls in place to determine valuation of takaful contract liabilities and retakaful contract assets; Assessment of the competence, capabilities and objectivity of the management appointed actuary; Tested the completeness, and on sample basis, the accuracy and relevance of data used to determine future cashflows; Evaluate and assess the recoverability of takaful receivables; Evaluated the appropriateness of the
Disclosure of transition impact of adopting IFRS 17	
We determined the disclosure of the impact of adopting IFRS 17 to be a key audit matter because of the significant changes introduced by the standard, which includes significant estimates and judgements, and because the impacts will be of particular importance to the readers of these financial statements. In particular, we have focused on the following key judgements that management have taken on implementing IFRS 17: - The determination of the transition approach adopted for each group of takaful contracts;	 Our audit procedures, among others, include: Assessed whether the judgements applied by management in determining their accounting policies are in accordance with IFRS 17; Using our actuarial specialist team members, evaluated the appropriateness of the methodology used to determine discount rates as at the transition date and historic periods where the fully retrospective approach is adopted;

To the shareholders of Arabian Scandinavian Insurance Company (PLC) - Takaful - ASCANA Insurance (continued)

Report on the Audit of the Financial Statements (continued)

Key Audit Matters (continued)

Key Audit Matter	How our audit addressed the key audit matter
Disclosure of transition impact of adopting IFRS 1	
- The methodology adopted, and key assumptions used to determine the impact and restatement of previously reported numbers in accordance with IFRS 17.	- Evaluation of the appropriateness of significant assumptions including risk adjustment, loss component, level of aggregation, PAA eligibility assessment and expenses included within the fulfilment cashflows;
- Disclosure of the impact of restatement, in accordance with IFRS 17.	 Evaluation of the completeness, and on sample basis, the accuracy and relevance of the data used to determine the impact of IFRS 17 adoption and restatement; and Evaluated the reasonableness of the quantitative and qualitative disclosures included in the financial statements in accordance with IFRS 17.
Valuation of investment properties	
The Company holds investment properties under the fair value model as at 31 December 2023 amounting to AED 67.51 million (2022: AED 160.64 million), as detailed in note 12 to the financial statements. The fair value estimate requires significant judgement and estimates by management and independent two external valuers. The Company has involved independent external valuers in order to value the investment properties for the purpose of determining the fair value for inclusion in the financial statements. The existence of significant estimation and judgement coupled with change in valuation assumptions used could result in material change. Therefore, the valuation of these investment properties was significant to our audit.	 Our audit procedures, among others, included: Assessing the competence, capabilities, and objectivity of external valuers; Evaluating the accuracy and completeness of the source data used in the calculation of fair values; Assessing the appropriateness of the key assumptions and methodologies used; and Performing an independent calculation after carrying out enquiries with management and independent valuer, including performing reasonableness computation by using publicly available sources of information to independently corroborate the valuation performed by management experts.

To the shareholders of Arabian Scandinavian Insurance Company (PLC) – Takaful – ASCANA Insurance (continued)

Report on the Audit of the Financial Statements (continued)

Other Information

Management is responsible for the other information. The other information comprises the information included in the Board of Directors' Report but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS and their preparation in compliance with the applicable provisions of the UAE Federal Law No. 32 of 2021 and Federal Law No 48 of 2023 (previously Federal Law No.6 of 2007), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

To the shareholders of Arabian Scandinavian Insurance Company (PLC) - Takaful - ASCANA Insurance (continued)

Report on the Audit of the Financial Statements (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
 of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based
 on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that
 may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a
 material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures
 in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions
 are based on the audit evidence obtained up to the date of our auditor's report. However, future events or
 conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

To the shareholders of Arabian Scandinavian Insurance Company (PLC) – Takaful – ASCANA Insurance (continued)

Report on other Legal and Regulatory Requirements

As required by the UAE Federal Law No. 32 of 2021, we report that:

- i) We have obtained all the information and explanations we considered necessary for the purposes of our audit;
- ii) The financial statements have been prepared and comply, in all material respects, with the applicable provisions of the UAE Federal Law No. 32 of 2021;
- iii) The Company has maintained proper books of account;
- iv) The financial information included in the Boards of Directors' Report, in so far as it relates to these financial statements, is consistent with the books of account of the Company;
- v) Note 5 to the financial statements discloses purchase of securities by the Company during the year ended 31 December 2023;
- vi) Note 9 to the financial statements discloses material related party transactions, and the terms under which they were conducted;
- vii) Based on the information that has been made available to us, nothing has come to our attention which causes us to believe that the Company has contravened during the financial year ended 31 December 2023 any of the applicable provisions of the Federal Law No. 32 of 2021, or in respect of the Company, its Articles of Association which would materially affect its activities or its financial position as at 31 December 2023; and
- viii) Note 27 to the financial statements discloses the social contributions made during the year ended 31 December 2023.

Further, as required by the UAE Federal Law No 48 of 2023 (previously Federal Law No.6 of 2007), we report that we have obtained all the information and explanation we considered necessary for the purpose of our audit.

1 Legal status and activities

Arabian Scandinavian Insurance Company PLC - Takaful - ASCANA Insurance (the "Company") is a public shareholding company and was registered in 1992. The Company is engaged in takaful and retakaful of all classes of business in accordance with the provisions of the United Arab Emirates ("UAE") Federal Law No. 6 of 2007, as amended, concerning Financial Regulations of Insurance Companies issued by the Central Bank of United Arab Emirates and regulation of its operations.

The Shareholders Extraordinary General Assembly Meeting held on 19 March 2014 approved conversion of the Company's business from conventional insurance to Takaful insurance. The Board of Directors appointed an Internal Sharia Supervision Committee for overseeing the compliance with Sharia.

During the year, Federal Law No. 48 of 2023 has been issued with effective date of 30 November 2023, repealing Federal Law No. 6 of 2007. In accordance with Article 112 of the Federal Law No. 48 of 2023, the Company has 6 months from this date of effect to apply the provisions of new Law.

The Company started issuing short term takaful contracts from 1 February 2015 in connection with life and nonlife takaful such as motor, marine, fire, engineering, medical and general accident risks (collectively known as general takaful) and the name of the Company was changed to Arabian Scandinavian Insurance Company PLC - Takaful ASCANA Insurance. The Company only operates in UAE, through its Dubai and Abu Dhabi offices.

During the year ended 31 December 2023, Oman Insurance Company P.S.C. ("Sukoon Insurance") has acquired 93% shareholding of the company from its key shareholders. Now the Company is a subsidiary of Sukoon Insurance which is incorporated in the Emirate of Dubai.

The ultimate parent company is Mashreq Bank (PSC) which is incorporated in the Emirate of Dubai.

This financial statement has been prepared in accordance with the requirements of the applicable laws and regulations, including UAE Federal Law No. (32) of 2021.

The address of the Company's registered office is P.O. Box 1993, Dubai, United Arab Emirates.

2 Statement of compliance with IFRS and basis of preparation

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) promulgated by International Accounting Standards Board (IASB) and interpretations thereof issued by the International Financial Reporting Interpretation Committee and in compliance with the applicable requirements of U.A.E Federal Law No. 32 of 2021, relating to commercial companies, and of UAE Federal Law No. 48 of 2023, concerning Financial Regulations of Insurance Companies issued by the Central Bank of United Arab Emirates and regulation of its operations. These financial statements are prepared in UAE Dirhams ("AED') being the economic, functional and reporting currency, rounded to the nearest thousand.

While applying the requirements of International Financial Reporting Standards 17-Insurance Contracts (IFRS 17), the Company has not considered shareholders' expenses in IFRS 17 assessment in line with Article 3.3 of Section 7 of the Financial Regulations for Takaful Companies (FRTC) and the relevant Shariah Board decisions. Further, in line with requirements of FRTC, the Company has only considered a fixed Wakala fee while applying the requirement of IFRS 17. Policy acquisition cost and general and administrative expenses accounts along with associated balance sheet items are part of the shareholders' accounts and presented separately.

2 Statement of compliance with IFRS and basis of preparation (continued)

New and revised IFRSs and interpretations applied on the financial statements

The following relevant standards, interpretations and amendments to existing standards were issued by the IASB:

Standard number	Title	Effective date
IAS 1	Disclosure of Accounting Policies – Amendments to IAS 1 and IFRS Practice Statement 2	1 January 2023
IAS 8	Definition of Accounting Estimates - Amendments to IAS 8	1 January 2023
IAS 12	Deferred Tax related to Assets and Liabilities arising from a single transaction – Amendments to IAS 12	1 January 2023
IFRS 17	Insurance Contracts	1 January 2023

These standards have been adopted by the Company and did not have a material impact on these financial statements, except for the adoption of "IFRS 17 Insurance contracts", which is detailed in note 3 to the financial statements.

Standards issued but not yet effective

The impact of the new standards, interpretations and amendments that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these standards, if applicable, when they become effective.

Standard number	Title	Effective date
IAS 1	Amendment to IAS 1 - Non-current liabilities with covenants	1 January 2024
IFRS 16	Amendment to IFRS 16 – Leases on sale and leaseback	1 January 2024

3 Significant accounting policies

Standards, interpretations and amendments to existing standards - Impact of new IFRS

IFRS 17 Insurance Contracts

IFRS 17 establishes principles for the recognition, measurement, presentation and disclosure of takaful contracts, re takaful contracts and investment contracts with discretionary participation features. It introduces a model that measures groups of contracts based on the Company's estimates of the present value of future cash flows that are expected to arise as the Company fulfils the contracts, an explicit risk adjustment for non-financial risk and a contractual service margin.

Under IFRS 17, takaful revenue in each reporting period represents the changes in the liabilities for remaining coverage that relate to services for which the Company expects to receive consideration and an allocation of contributions that relate to recovering takaful acquisition cash flows. In addition, investment components are no longer included in takaful revenue and takaful service expenses.

IFRS 17 replaces IFRS 4 Insurance Contracts for annual periods on or after 1 January 2023. The Company has restated comparative information applying the transitional provisions to IFRS 17. The nature of the changes in accounting policies can be summarised, as follows:

Changes to classification and measurement

The adoption of IFRS 17 did not change the classification of the Company's takaful contracts. The Company was previously permitted under IFRS 4 to continue accounting using its previous accounting policies. However, IFRS 17 establishes specific principles for the recognition and measurement of takaful contracts issued and retakaful contracts held by the Company.

Standards, interpretations and amendments to existing standards – Impact of new IFRS (continued)

IFRS 17 Insurance Contracts (continued)

Changes to classification and measurement (continued)

Under IFRS 17, the Company's takaful contracts issued, and retakaful contracts held are all eligible to be measured by applying the premium allocation approach (PAA) (called as "contribution allocation approach" (CAA) for takaful company). The CAA simplifies the measurement of takaful contracts in comparison with the general model in IFRS 17.

The Company applies the CAA to simplify the measurement of all of its takaful and retakaful contracts. When measuring liabilities for remaining coverage, the CAA is similar to the Company's previous accounting treatment. However, when measuring liabilities for outstanding claims, the Company now discounts the future cash flows (unless they are expected to occur in one year or less from the date on which the claims are incurred) and includes an explicit risk adjustment for non-financial risk.

Income and expenses from retakaful contracts other than takaful finance income and expenses are now presented as a single net amount in profit or loss. Previously, amounts recovered from Retakaful operators and retakaful expenses were presented separately.

The measurement principles of the CAA differ from the 'earned contribution approach' used by the Company under IFRS 4 in the following key areas:

- The liability for remaining coverage reflects contributions received less deferred acquisition expenses less amounts recognised in revenue for takaful services provided;
- Measurement of the liability for remaining coverage includes an adjustment for the time value of
 money and the effect of financial risk where the contribution due date and the related period of
 coverage are more than 12 months apart;
- Measurement of the liability for remaining coverage involves an explicit evaluation of risk adjustment for non-financial risk when a group of contracts is onerous in order to calculate a loss component (previously these may have formed part of the unexpired risk reserve provision); and
- Measurement of the liability for incurred claims (previously claims outstanding and incurred-but-notreported (IBNR) is determined on a discounted probability-weighted expected value basis and includes an explicit risk adjustment for non-financial risk.

Changes to presentation and disclosure

For presentation in the statement of financial position, the Company aggregates takaful and retakaful contracts issued and retakaful contracts held, respectively and presents separately:

- Groups of takaful and retakaful contracts issued that are assets;
- Groups of takaful and retakaful contracts issued that are liabilities;
- Groups of retakaful contracts held that are assets; and
- Groups of retakaful contracts held that are liabilities.

The groups referred to above are those established at initial recognition in accordance with the IFRS 17 requirements.

The line item descriptions in the statement of profit or loss and other comprehensive income have been changed significantly compared with last year. Previously, the Company reported the following line items:

- Gross written contributions
- Net written contributions
- Changes in contribution reserves
- Gross takaful claims
- Net takaful claims

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 Insurance Contracts (continued)

Changes to presentation and disclosure (continued)

Instead, IFRS 17 requires separate presentation of:

- Takaful revenue
- Takaful service expenses
- Takaful finance income or expenses
- Income or expenses from retakaful contracts held

The Company provides disaggregated qualitative and quantitative information about:

- Amounts recognised in its financial statements from takaful contracts
- Significant judgements, and changes in those judgements, when applying the standard.

Transition

Changes in accounting policies resulting from the adoption of IFRS 17 have been applied using a full retrospective approach to the extent practicable. Under the full retrospective approach, at 1 January 2022 the Company:

- identified, recognised and measured each group of takaful and retakaful contracts as if IFRS 17 had always been applied;
- identified, recognised and measured any assets for takaful acquisition cash flows as if IFRS 17 had always been applied;
- derecognised previously reported balances that would not have existed if IFRS 17 had always been applied. These included takaful receivables and payables, and provisions for levies that are attributable to existing takaful contracts. Under IFRS 17, they are included in the measurement of the takaful contracts; and
- recognised any resulting net difference in equity.

The Company has applied the transition provisions in IFRS 17 and has disclosed the impact of the adoption of IFRS 17 on each financial statement line item. The effects of adopting IFRS 17 on the financial statement at 1 January 2022 are presented in the statement of changes in equity.

Amounts due to related parties	8	(8)	<u>_</u>
Deferred discount	2,290	(2,290)	-
EQUITY			
Retained earnings	309,751	586	310,337

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 Insurance Contracts (continued)

Takaful and retakaful contracts classification

The Company issues takaful contracts in the normal course of business, under which it accepts significant takaful risk from its participants. As a general guideline, the Company determines whether it has significant takaful risk, by comparing benefits payable after an insured event with benefits payable if the insured event did not occur. takaful contracts can also transfer financial risk.

Takaful and retakaful contracts accounting treatment

Separating components from Takaful and retakaful contracts

The Company assesses its takaful and retakaful products to determine whether they contain distinct components which must be accounted for under another IFRS instead of under IFRS 17.

Some retakaful contracts issued contain profit commission arrangements. Under these arrangements, there is a minimum guaranteed amount that the participant will always receive – either in the form of profit commission, or as claims, or another contractual payment irrespective of the insured event happening. The minimum guaranteed amounts have been assessed to be highly interrelated with the component of the retakaful contracts and are, therefore, non-distinct investment components which are not accounted for separately.

Level of aggregation

IFRS 17 requires a company to determine the level of aggregation for applying its requirements. The Company previously applied aggregation levels under IFRS 4, which were significantly higher than the level of aggregation required by IFRS 17. The level of aggregation for the Company is determined firstly by dividing the business written into portfolios. Portfolios comprise groups of contracts with similar risks which are managed together. Portfolios are further divided based on expected profitability at inception into two categories: onerous contracts and others. This means that, for determining the level of aggregation, the Company identifies a contract as the smallest 'unit', i.e., the lowest common denominator. However, the Company makes an evaluation of whether a series of contracts need to be treated together as one unit based on reasonable and supportable information, or whether a single contract contains components that need to be separated and treated as if they were stand-alone contracts. As such, what is treated as a contract for accounting purposes may differ from what is considered as a contract for other purposes (i.e., legal or management). IFRS 17 also notes that no group for level of aggregation purposes may contain contracts issued more than one year apart.

The Company has elected to group together those contracts that would fall into different groups only because law, regulation or internal policies specifically constrains its practical ability to set a different price or level of benefits for participants with different characteristics. The Company applied a full retrospective approach for transition to IFRS 17. The portfolios are further divided into groups of contracts by quarter of issue and profitability for recognition and measurement purposes. Hence, within each quarter of issue, portfolios of contracts are divided into two groups, as follows:

- A group of contracts that are onerous at initial recognition (if any)
- A group of the remaining contracts in the portfolio (if any)

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Level of aggregation (continued)

The profitability of groups of contracts is assessed by IFRS 17 committee that take into consideration existing and new business. The Company assumes that no contracts in the portfolio are onerous at initial recognition unless facts and circumstances indicate otherwise. For contracts that are not onerous, the Company assesses, at initial recognition, that there is no significant possibility of becoming onerous subsequently by assessing the likelihood of changes in applicable facts and circumstances.

The Company has a IFRS 17 Committee that meets at regular intervals to determine the profitability groupings of each portfolio of contracts. The committee acts as a forum to collect input from the pricing and underwriting functions and assess the relevant facts and circumstances which indicate that groups of contracts are onerous at initial recognition.

Below are some of the relevant facts and circumstances that the Company considers:

- Evaluation of expected combines ratios;
- Pricing information;
- Results of similar contracts it has recognised; and
- Environment factors, e.g., a change in market experience or regulations.

The Company divides portfolios of retakaful contracts held applying the same principles set out above, except that the references to onerous contracts refer to contracts on which there is a net gain on initial recognition. For some groups of retakaful contracts held, a group can comprise a single contract.

Recognition

The Company recognises groups of takaful contracts it issues from the earliest of the following:

- The beginning of the coverage period of the group of contracts;
- The date when the first payment from a participant in the group is due or when the first payment is received if there is no due date;
- For a group of onerous contracts, if facts and circumstances indicate that the group is onerous the Company recognises a group of retakaful contracts held:
- If the retakaful contracts provide proportionate coverage at the later of the beginning of the coverage period of the group, or the initial recognition of any underlying contract; and
- In all other cases, from the beginning of the coverage period of the group the Company adds new contracts to the group when they are issued or initiated.

Contract boundary

The Company includes in the measurement of a group of takaful contracts all the future cash flows within the boundary of each contract in the group. Cash flows are within the boundary of a takaful contract if they arise from substantive rights and obligations that exist during the reporting period in which the Company can compel the participant to pay the contributions, or in which the Company has a substantive obligation to provide the participant with services. A substantive obligation to provide services ends when:

• The Company has the practical ability to reassess the risks of the particular participant and, as a result, can set a price or level of benefits that fully reflects those risks; or

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Contract boundary (continued)

Both of the following criteria are satisfied:

- The Company has the practical ability to reassess the risks of the portfolio of takaful contracts that contain the contract and, as a result, can set a price or level of benefits that fully reflects the risk of that portfolio; and
- The pricing of the contributions for coverage up to the date when the risks are reassessed does not take into account the risks that relate to periods after the reassessment date.

A liability or asset relating to expected contributions or claims outside the boundary of the takaful contract is not recognised. Such amounts relate to future takaful contracts.

Measurement - Contribution Allocation Approach

Takaful contracts - initial measurement

The Company applies the contribution allocation approach (CAA) to all the takaful contracts that it issues and retakaful contracts that it holds, as:

• The coverage period of each contract in the group is one year or less, including coverage arising from all contributions within the contract boundary.

Or

• For contracts longer than one year, the Company has modelled possible future scenarios and reasonably expects that the measurement of the liability for remaining coverage for the group containing those contracts under the CAA does not differ materially from the measurement that would be produced applying the general model. In assessing materiality, the Company has also considered qualitative factors such as the nature of the risk and types of its lines of business.

For a group of contracts that is not onerous at initial recognition, the Company measures the liability for remaining coverage as the contributions, if any, received at initial recognition, minus any takaful acquisition cash flows at that date, there is no allowance for time value of money as the contributions are

mostly received within one year of the coverage period.

The Company measures its retakaful assets for a group of retakaful contracts that it holds on to the same basis as takaful contracts that it issues, however, adapted to reflect the features of retakaful contracts held that differ from takaful contracts issued, for example the generation of expenses or reduction in expenses rather than revenue.

Takaful contracts - subsequent measurement

The Company measures the carrying amount of the liability for remaining coverage at the end of each reporting period as the liability for remaining coverage at the beginning of the period:

- Plus contributions received in the period;
- Minus capitalised takaful acquisition cash flows;
- Plus any amounts relating to the amortisation of the acquisition cash flows recognised as an expense in the reporting period for the group;
- Plus any adjustment to the financing component, where applicable;

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Measurement - Contribution Allocation Approach (continued)

Takaful contracts - subsequent measurement (continued)

- Minus the amount recognised as takaful revenue for the coverage period; and
- Minus any investment component paid or transferred to the liability for incurred claims.

The Company estimates the liability for incurred claims as the fulfilment cash flows related to incurred claims. The fulfilment cash flows incorporate, in an unbiased way, all reasonable and supportable information available without undue cost or effort about the amount, timing and uncertainty of those future cash flows, they reflect current estimates from the perspective of the entity and include an explicit adjustment for non-financial risk (the risk adjustment). The Company does not adjust the future cash flows for the time value of money and the effect of financial risk for the measurement of liability for incurred claims that are expected to be paid within one year of being incurred.

Retakaful contracts

The subsequent measurement of retakaful contracts held follows the same principles as those for takaful contracts issued and has been adapted to reflect the specific features of retakaful held.

Takaful contracts - modification and derecognition

The Company derecognises takaful contracts when:

• The rights and obligations relating to the contract are extinguished (i.e., discharged, cancelled or expired);

The contract is modified such that the modification results in a change in the measurement model or the applicable standard for measuring a component of the contract, substantially changes the contract boundary, or requires the modified contract to be included in a different group. In such cases, the Company derecognises the initial contract and recognises the modified contract as a new contract.

When a modification is not treated as a derecognition, the Company recognises amounts paid or received for the modification with the contract as an adjustment to the relevant liability for remaining coverage.

Presentation

The Company has presented separately, in the statement of financial position, the carrying amount of groups of takaful contracts issued that are assets, groups of takaful contracts issued that are liabilities, retakaful contracts held that are assets and groups of retakaful contracts held that are liabilities.

Any assets or liabilities for takaful acquisition cash flows recognised before the corresponding takaful contracts are included in the carrying amount of the related groups of takaful contracts issued.

The Company disaggregates the total amount recognised in the statement of profit or loss and other comprehensive income into a takaful service result, comprising takaful revenue and takaful service expense, and takaful finance income or expenses.

The Company disaggregate the change in risk adjustment for non-financial risk between a financial and non-financial portion which will be presented in takaful finance income or expenses and in takaful service result respectively.

The Company separately presents income or expenses from retakaful contracts held from the expenses or income from takaful contracts issued.

3 Significant accounting policies (continued)

Standards, interpretations and amendments to existing standards - Impact of new IFRS (continued)

IFRS 17 Insurance Contracts (continued)

Takaful and retakaful contracts accounting treatment (continued)

Takaful revenue

The takaful revenue for the period is the amount of expected contribution receipts (excluding any investment component) allocated to the period. The Company allocates the expected contribution receipts to each period of coverage on the basis of the passage of time; but if the expected pattern of release of risk during the coverage period differs significantly from the passage of time, then on the basis of the expected timing of incurred takaful service expenses.

The Company changes the basis of allocation between the two methods above as necessary, if facts and circumstances change. The change is accounted for prospectively as a change in accounting estimate.

Loss components

The Company assumes that no contracts are onerous at initial recognition unless facts and circumstances indicate otherwise. If at any time during the coverage period, the facts and circumstances indicate that a group of takaful contracts is onerous, the Company establishes a loss component as the excess of the fulfilment cash flows that relate to the remaining coverage of the group over the carrying amount of the liability for remaining coverage of the group. Accordingly, by the end of the coverage period of the group of contracts the loss component will be zero.

Takaful finance income and expense

Takaful finance income or expenses comprise the change in the carrying amount of the group of takaful contracts arising from:

- The effect of the time value of money and changes in the time value of money; and
- The effect of financial risk and changes in financial risk.

The Company disaggregates takaful finance income or expenses in the profit or loss. The impact of changes in market profit rates on the value of the takaful assets and liabilities are reflected in the profit or loss.

Net income or expense from retakaful contracts held

The Company presents separately on the face of the statement of profit or loss, the amounts expected to be recovered from retakaful operators, and an allocation of the retakaful contributions paid. The Company treats retakaful cash flows that are contingent on claims on the underlying contracts as part of the claims that are expected to be reimbursed under the retakaful contract held.

Surplus/deficit in participants' fund

If the surplus in the participants' fund at the end of a year is sufficiently large, a percentage of the surplus shall be distributed between participants that have not made a claim, in proportion to their risk contributions to the fund after accounting for reserves. The distributions will be approved by the Company's Internal Sharia Supervision Committee. Any remaining surplus after the distribution will remain in the participants' fund.

A deficiency in participants' fund is made good by a profit free loan (Qard Hasan) from the shareholders' fund. This Qard Hasan is to be repaid from future surpluses arising from takaful operations on a priority basis. This Qard Hasan is tested for impairment annually and the portion of the Qard Hasan that is considered impaired is charged to the statement of income.

On liquidation of the fund, the accumulated surplus in the participants' fund, if any, after meeting all obligations (including repayment of the outstanding amount of Qard Hasan), will be dealt with after consulting with the Company's Internal Sharia Supervision Committee. In case of an accumulated deficit, any Qard Hasan outstanding at the time of liquidation will not be repayable by the participants' fund and the shareholders' fund will forego such outstanding amount.

Any deficit in the participants' fund, except for deficits arising from a decline in the fair value of securities, is financed by the shareholders through a Qard Hasan (loan without any profit). The Company maintains a full provision against the Qard Hasan.

Property and equipment

Property and equipment are carried at cost less any accumulated depreciation and any identified impairment losses.

Depreciation is charged so as to write off the cost of assets, over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. The gain or loss arising on disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in statement of income.

The useful life considered in the calculation of depreciation of all the assets is 4 years.

Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation including properties under construction for such purposes. Investment properties are measured initially at cost, including transaction costs. Cost includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the cost of day to day servicing of an investment property. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the statement of income in the period in which they arise.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal.

Investment properties (continued)

Transfer is made to or from investment property only when there is a change in use evidenced by the end of owner-occupation, commencement of an operating lease to another party. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property and equipment up to the date of the change in use.

Fair value is determined by open market values based on valuations performed by independent surveyors.

Leases

The Company recognises a right-to-use asset and a lease liability at the lease commencement date.

The right-to-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus as initial direct costs incurred. The right-to-use is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-to-use or the end of the lease term. The estimated useful life of the right-to-use asset is determined on the same basis as those of property and equipment. In addition, the right-to-use is periodically reduced by impairment losses, if any and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the profit rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental funding rate. Generally, the Company uses its incremental funding rates as the discount rate.

The lease liability is measured at amortised cost using the effective funding cost method. It is remeasured when there is a change in the future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-to-use asset or is recorded in the profit or loss if the carrying amount of the right-to-use asset has been reduced to zero.

The Company presents right-to-use assets that do not meet the definition of investment property in 'Property and equipment' and the lease liabilities as a separate item in the statement of financial position.

Wakala fees

The Company manages the takaful operations on behalf of the participants for a wakala fee which is recognised on an accrual basis. A similar amount is shown as expense statement of income attributable to participants.

Profit income

Profit income is recognised on an accrual basis taking into account effective funding cost rates on the instrument, on a time proportionate basis when it becomes receivable.

Rental income

Rental income from investment property is recognised on a straight-line basis over the term of the lease.

Dividend income

Dividend income is recognised when the right to receive payment is established.

Financial instruments

Recognition, initial measurement and derecognition

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value plus transactions costs. Regular way purchases and sales of financial assets are recognised on the date on which the Company commits to purchase or sell the asset i.e. the trade date. Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognised when it is extinguished.

Classification and subsequent measurement of financial assets

For the purposes of subsequent measurement, the Company classifies its financial assets into the following categories:

i) Financial assets at amortised cost

Financial assets at amortised cost are those financial assets for which:

- the Company's business model is to hold them in order to collect contractual cash flows; and

- the contractual terms give rise on specific dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

After initial recognition these are measured at amortised cost using the effective funding cost method, less provision for impairment. Discounting is omitted where the effect of discounting is immaterial.

These are included in current assets, except for maturities greater than 12 months after the end of the reporting period which are classified as non-current assets.

Financial assets at amortised cost comprise statutory deposits, cash and cash equivalents, due from related parties and most other receivables.

ii) Financial assets at fair value through other comprehensive income ('FVTOCI')

Investments in equity securities are classified as FVTOCI. At initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity investments at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading.

Gain or loss arising from change in fair value of investments at FVTOCI is recognised in other comprehensive income and reported within the fair value reserve for investments at FVTOCI within equity. When the asset is disposed of, the cumulative gain or loss recognised in other comprehensive income is not reclassified from the equity reserve to income statement but is reclassified to retained earnings.

iii) Financial assets at fair value through profit and loss ('FVTPL')

Investments in equity instruments are classified as at FVTPL, unless the Company designates an investment that is not held for trading as at fair value through other comprehensive income (FVTOCI) on initial recognition.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in statement of income.

Dividend income on investments in equity instruments at FVTPL is recognised in statement of income when the Company's right to receive the dividends is established.

Financial instruments (continued)

Fair value measurement

For investments traded in organised financial markets, fair value is determined by reference to stock exchange quoted prices at the close of business on the statement of financial position date. Investments in unquoted securities are measured at fair value, considering observable market inputs and unobservable financial data of investees.

Classification and subsequent measurement of financial liabilities

Financial liabilities comprise amounts due to related parties and most other payables. Financial liabilities are measured subsequently at amortised cost using the effective funding cost method.

Impairment and uncollectability of financial assets

The Company recognises loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- financial guarantee contracts issued; and
- financing commitments issued.

The Company measures loss allowances at an amount equal to lifetime ECL, except for those financial instruments on which credit risk has not increased significantly since their initial recognition, in which case 12-month ECL are measured.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after reporting date.

ECL are probability-weighted estimates of credit losses. They are measured as follows:

Impairment and uncollectability of financial assets (continued)

- financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).
- financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- undrawn financing commitments: as the present value of the difference between the contractual cash flows that are due to the Company if the commitment is drawn down and the cash flows that the Company expects to receive; and
- financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Company expects to recover.

Offsetting financial instruments

Financial assets and liabilities are offset, and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Employee benefits

Short-term employee benefits

The cost of short-term employee benefits (those payable within 12 months after the service is rendered such as paid vacation leave and bonuses) is recognised in the period in which the service is rendered.

Provision for employees' end of service benefits

A provision for employees' end of service benefits is made for the full amount due to employees for their periods of service up to the reporting date in accordance with the UAE Labour Law and is reported as separate line item under non-current liabilities. The entitlement to end of service benefits is based upon the employees' salary and length of service, subject to the completion of a minimum service period as specified in the UAE Labour Law. The expected costs of these benefits are accrued over the period of employment.

Foreign currency transactions

Transactions in foreign currencies are translated to AED at the foreign exchange rate ruling at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies at the statement of financial position date are translated to AED at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the income statement.

Non-monetary items are not retranslated at year-end and are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

Impairment of non-financial assets

The carrying amounts of the Company's non-financial assets are reviewed at each statement of financial position date or whenever there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. The impairment losses are recognised in the income statement. An impairment charge is reversed if the cash-generating unit's recoverable amount exceeds its carrying amount.

Short term operating leases

Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are recognised in the income statement on a straight-line basis over the term of the lease.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances, call deposits, current accounts and fixed deposits which have original maturities of less than 3 months and are free from lien.

Provisions, contingent liabilities and contingent assets

Provisions are recognised when present obligations as a result of a past event will probably lead to an outflow of economic resources from the Company and amounts can be estimated reliably.

Timing or amount of the outflow may still be uncertain. A present obligation arises from the presence of a legal or constructive commitment that has resulted from past events.

3 Significant accounting policies (continued)

Provisions, contingent liabilities and contingent assets (continued)

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will

be required in settlement is determined by considering the class of obligations as a whole. Provisions are discounted to their present values, where the time value of money is material.

Any reimbursement that the Company can be virtually certain to collect from a third party with respect to the obligation is recognised as a separate asset. However, this asset may not exceed the amount of the related provision.

All provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

In those cases where the possible outflow of economic resources as a result of present obligations is considered improbable or remote, no liability is recognised, unless it was assumed in the course of a business combination.

Possible inflows of economic benefits to the Company that do not yet meet the recognition criteria of an asset are considered contingent assets.

Equity, reserves and dividend payments

Share capital represents the nominal value of shares that have been issued.

Other details for reserves are mentioned in notes 19, 20 and 21 to the financial statements.

Retained earnings include all current and prior period retained profits or losses.

Dividend payable to equity shareholders is included in other liabilities only when the dividend has been approved in a general assembly meeting prior to the reporting date.

Segment reporting

Under IFRS 8 "Operating Segments", reported segments' profits are based on internal management reporting information that is regularly reviewed by the chief operating decision maker. The measurement policies used by the Company for segment reporting under IFRS 8 are the same as those used in its financial statements.

4 Critical accounting estimates and judgements in applying accounting policies

Judgements and estimates

The preparation of this financial statements requires management to make judgements, estimates and assumptions that effect the application of accounting policies and the reported amounts of assets and liabilities, income, and expense. Actual results may differ from these estimates.

In preparing this financial statements, the significant judgements made by management in applying the accounting policies and the key sources of estimation uncertainty were the same as those that were applied in the audited financial statements as at and for the year ended 31 December 2022, except for the below judgements.

Takaful and retakaful contracts

The Company applies the CAA to simplify the measurement of takaful contracts. When measuring liabilities for remaining coverage, the CAA is broadly similar to the Company's previous accounting treatment under IFRS 4. However, when measuring liabilities for incurred claims, the Company now discounts cash flows that are expected to occur more than one year after the date on which the claims are incurred and includes an explicit risk adjustment for non-financial risk.

Liability for remaining coverage

For takaful acquisition cash flows, the Company is eligible and chooses to capitalise all takaful acquisition cashflows upon payments.

The effect of recognising takaful acquisition cash flows as an expense on initial recognition of group of takaful contracts is to increase the liability for remaining coverage on initial recognition and reduce the likelihood of any subsequent onerous contract loss. There would be an increased charge to profit or loss on initial recognition, due to expensing acquisition cash flows, offset by an increase in profit released over the coverage period. For groups of contracts that are onerous, the liability for remaining coverage is determined by the fulfilment cash flows.

Liability for incurred claims

The ultimate cost of outstanding claims is estimated by using a range of standard actuarial claims projection techniques, such as Chain Ladder and Bornheutter-Ferguson methods.

The main assumption underlying these techniques is that a Company's past claims development experience can be used to project future claims development and hence ultimate claims costs. These methods extrapolate the development of paid and incurred losses, average costs per claim (including claims handling costs), and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by significant business lines and claim types. Large claims are usually separately addressed, either by being reserved at the face value of loss adjuster estimates or separately projected in order to reflect their future development. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based. Additional qualitative judgement is used to assess the extent to which past trends may not apply in future, (e.g., to reflect one-off occurrences, changes in external or market factors such as public attitudes to claiming, economic conditions, levels of claims inflation, judicial decisions and legislation, as well as internal factors such as portfolio mix, policy features and claims handling procedures) in order to arrive at the estimated ultimate cost of claims that present the probability weighted expected value outcome from the range of possible outcomes, taking account of all the uncertainties involved.

Other key circumstances affecting the reliability of assumptions include variation in profit rates, delays in settlement and changes in foreign currency exchange rates.

4 Critical accounting estimates and judgements in applying accounting policies (continued)

Discount rates

The Company use bottom-up approach to derive the discount rate. Under this approach, the discount rate is determined as the risk-free yield, adjusted for differences in liquidity characteristics between the financial assets used to derive the risk-free yield and the relevant liability cash flows (known as an 'illiquidity contribution'). The risk-free rate was derived using swap rates available in the market denominated in the same currency as the product being measured. When swap rates are not available, highly liquid sovereign bonds with a AAA credit rating were used. Management uses judgment to assess liquidity characteristics of the liability cash flows.

Discount rates applied for discounting of future cash flows are listed below:

	1 ye	ar	3 ye	ars	5 ye	ars	10	years
	2023	2022	2023	2022	2023	2022	2023	2022
	%	%	%	%	%	%	%	%
Takaful contracts issue	d							
	6.11	5.34	5.29	5.13	5.08	4.28	5.10	3.99
Retakaful contracts issu	led							
	6.11	5.34	5.29	5.13	5.08	4.28	5.10	3.99

Risk adjustment for non-financial risk

The risk adjustment for non-financial risk is the compensation that the Company requires for bearing the uncertainty about the amount and timing of the cash flows of groups of takaful contracts. The risk adjustment reflects an amount that a takaful operator would rationally pay to remove the uncertainty that future cash flows will exceed the expected value amount.

The Company has estimated the risk adjustment using a confidence level (probability of sufficiency) approach at the 65th percentile. That is, the Company has assessed its indifference to uncertainty for all product lines (as an indication of the compensation that it requires for bearing non-financial risk) as being equivalent to the 65th percentile confidence level less the mean of an estimated probability distribution of the future cash flows. The Company has estimated the probability distribution of the future cash flows. The Company has estimated the probability distribution of the future cash flows, and the additional amount above the expected present value of future cash flows required to meet the target percentiles.

Fair value of unquoted securities

Fair value of unquoted securities has been determined by the management based on Earnings Multiple and Net Assets Value Techniques using observable market data of comparable public entities, certain discount factors and unobservable financial data of respective non-public investees. Actual results may substantially be different.

Investment properties fair value judgement

Fair value of investment property is estimated by two independent professional valuers for disclosure purposes only, considering the rental yield (income approach). This estimate is made on an annual basis considering market rent and average rental yield. Fair value was dependent on market factors and availability of information.

Expected credit losses

Management reviews the provision for expected credit losses (ECL) at each reporting date by assessing the recoverability of takaful and retakaful receivables. For non-takaful receivables the recoverability is assessed, and expected credit losses are created in compliance with the simplified approach under the IFRS 9 methodology.

5 Other financial assets

The Company's other financial assets at the end of reporting year are detailed below:

	2023 AED'000	2022 AED'000
Other financial assets measured at fair value through other comprehensive income (FVTOCI)		
Unquoted U.A.E. equity securities (a)	247	1,939
Quoted U.A.E. Sukuk (b)	21,293	56,946
Unquoted outside UAE	8,699	9,559
-	30,239	68,444
Attributable to:	Restances and a second s	and the second second
Participants	1,625	9,060
Shareholders	28,614	59,384
	30,239	68,444
Other financial assets measured at fair value through profit and loss (FVTPL)		
Quoted U.A.E. equity securities (c)	-	3,538
Unquoted U.A.E. equity securities (a)	557	515
	557	4,053

All other financial assets measured at fair value through profit and loss (FVTPL) are attributable to Shareholders.

- (a) The Company holds investments in unquoted equity securities of three entities as at 31 December 2023 (2022: three entities). Unobservable financial data used in determining the fair values of these unquoted securities has been extracted from their latest available audited financial statements for the year ended 31 December 2022, and current market available information. (2022: financial statements for the year ended 31 December 2021).
- (b) Fair values have been determined by reference to quoted prices at the reporting date. During the year, the Company purchased quoted sukuk amounting to AED 2.73 million (2022: AED 10.04 million) while sold quoted sukuk amounting to AED 38.32 million (2022: AED Nil).
- (c) Fair values have been determined by reference to quoted prices at the reporting date. During the year, the Company sold quoted equity securities amounting to AED 3.54 million (2022: AED 10.45 million) while no purchase of quoted securities has been made in 2023 (2022: AED 3.48 million).

The movement in other financial assets are as follows:

	FVT	DCI	FVTP	L
	2023	2022	2023	2022
	AED'000	AED'000	AED'000	AED'000
Fair value, at the beginning of				
the year	68,444	57,977	4,053	11,225

Sold during the year	(38,323)	2 2	(3,538)	(10,446)
Change in fair value	(2,616)	(5,112)	42	(201)
Fair value, at the end of the				
year	30,239	68,444	557	4,053

6 Cash and bank balances		
	2023	2022
	AED'000	AED'000
Cash on hand	6	19
Bank balances:		
Wakala deposits	193,881	82,812
Current accounts	10,276	33,700
	204,163	116,531
Attributable to:		
Participants	107,717	36,630
Shareholders	96,446	79,901
	204,163	116,531

The profit rates on the Wakala deposits with banks range from 4.60% to 5.85% (2022: 0.60 % to 5.10%).

Wakala deposits amounting to AED 190.65 million (2022: AED 45.51 million) have maturity more than three months.

All cash and bank balances are maintained within U.A.E.

7 Takaful and retakaful contracts

The breakdown of groups of takaful and retakaful contracts issued, and retakaful contracts held, that are in an asset position and those in a liability position is set out in the table below:

		2023			2022 Restated	
	Assets	Liabilities	Net	Assets	Liabilities	Net
	AED'000	AED'000	AED'000	AED'000	AED'000	AED'000

Roll-forward of net asset or liability for takaful contracts issued showing the liability for remaining coverage and the liability for incurred claims

The Company disaggregates information to provide disclosure in respect of major product lines separately: Motor takaful, medical and group life, and general retakaful issued.

This disaggregation has been determined based on how the Company is managed. The roll-forward of the net asset or liability for takaful contracts issued, showing the liability for remaining coverage and the liability for incurred claims, is disclosed in the table on the next page.

Disposal during the year	(9,500)	(77,156)	(86,656)
Change in fair value during the year (note 25)		(6,475)	(6,475)
At 31 December	-	67,510	67,510
2022			
At 1 January	9,363	149,352	158,715
Change in fair value during the year (note 25)	137	1,789	1,926
At 31 December	9,500	151,141	160,641

On 31 December 2023, two independent and experienced professional valuers estimated the fair value of investment property at AED 67 million and AED 68 million respectively (31 December 2022: two independent and experienced professional valuers estimated the fair value of investment property at AED 160.71 million and AED 160.58 million respectively).

12 Investment properties (continued)

Company recognises the average of fair value from both valuers. The valuers hold relevant professional qualifications and experience. Investment properties is held for capital appreciation and rental purposes.

Investment property amounting to AED Nil (2022: AED 6 million) is registered in the name of heirs of Mohammad Amin Al Kazim (related party) held for the beneficial interest of the Company. This investment property has been sold during the year.

Details of the investment properties and information about the fair value hierarchy as at 31 December 2023 and 31 December 2022 are as follows:

				Fair value as at
				31 December
	31	December 2023	5	2022
	Level 1	Level 2	Level 3	Level 3
	AED'000	AED'000	AED'000	AED'000
Investment properties	-		67,510	160,641

As the investment properties are valued using income capitalisation approach, a slight increase in the capitalisation rate used would result in a significant decrease in fair value, and vice versa.

All investment properties are located in U.A.E.

The property rental income earned by the Company from its investment properties, which are leased under operating leases on an annual basis and the direct operating expenses arising in the management of the investment properties are as follows:

	2023	2022
	AED'000	AED'000
Rental income	8,701	9,591
Direct operating expenses	(903)	(1,451)
Net income from investment properties	7,798	8,140

19 Statutory reserve

In accordance with the Company's Articles of Association and Article 241 of the Federal Law No. 32 of 2021, a minimum of 10% of the Company's annual net profits must be transferred to a non-distributable legal reserve. As per the Company's Articles of Association, such transfers are required until the balance in the legal reserve equals 50% of the Company's paid-up share capital. No transfer to legal reserve has been made during the year as it has already reached 50% of the paid-up share capital (2022: Nil).

20 Retakaful reserve

In accordance with Central Bank of the United Arab Emirates' Board of Directors' Decision No. 23, Article 34, an amount of AED 215,725 (2022: AED 170,000) based on the retakaful share of contribution at a rate of 0.5% was transferred from retained earnings to retakaful reserve. The reserve is not available for distribution and will not be disposed of without prior approval from Central Bank of the UAE.

21 Investments revaluation reserve - FVTOCI

This reserve records gains and losses arising from changes in fair value of other financial assets measured at fair value through other comprehensive income (FVTOCI).

22 Gross written contributions

*Social contributions during the year ended 31 December 2023 amounted to AED 226,105 (2022: 261,396 AED).

28 Segmental information

For management purposes the Company is organised into two business segments; general takaful management and investment. The general takaful segment comprises the takaful business undertaken by the Company on behalf of Participants. Investment comprises investment and cash management for the Company's own account. No operating segments have been aggregated to form the above reportable operating segments.

Segment performance is evaluated based on profit or loss which in certain respects is measured differently from profit or loss in the financial statements.

Except for Wakala fees, and Qard Hassan, no other inter-segment transactions occurred during the year. If any other transaction were to occur, transfer prices between operating segments are set on an arm's length basis in a manner similar to transactions with third parties.

28 Segment information (continued)

These segments are the basis on which the Company reports its primary segment information. Segmental information is presented below:

48

29 Loss per share

Loss per share are calculated by dividing the loss for the year by the number of ordinary shares outstanding as of the end of the year as follows:

	2023	Restated 2022
Loss for the year (in AED'000)	(76,530)	(30,677)
Number of ordinary shares outstanding	154,000,000	154,000,000
Basic and diluted loss per share (in AED)	(0.497)	(0.199)

Diluted loss per share as of 31 December 2023 and 31 December 2022 are equivalent to basic loss per share as the Company did not issue any new instrument that would impact loss per share when executed.

30 Zakat

For the year ended 31 December 2023, Zakat amounting AED per share will not be borne by the Company on behalf of shareholders AED 0.0029 per share (2022: AED 0.0055 per share).

31 Cash and cash equivalents

For the purposes of statement of cash flows, cash and cash equivalents include cash and bank balances net of wakala deposits in banks with maturity over three months. Cash and cash equivalents at the end of the year as shown in the statement of cash flows can be reconciled to the related items in the statement of financial position as follows:

	2023	2022
	AED'000	AED'000
Cash and bank balances (note 6)	204,163	116,531
Wakala deposits with maturity over 3 months	(190,653)	(45,509)
Cash and cash equivalents	13,510	71,022

32 Capital risk management

The Company's objectives when managing capital are:

- to comply with the takaful capital requirements required by UAE Federal Law No. 6 of 2007, as amended. The Company manages its capital on a basis of its minimum regulatory capital position presented in the table below:
- to safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- to provide an adequate return to shareholders by pricing takaful contracts commensurately with the level of risk.

Section 2 of the Financial Regulations for Takaful Companies (the "Regulations") issued by the Central Bank of UAE identifies the required solvency margin to be held in addition to takaful liabilities. The solvency margin must be maintained at all times throughout the year. The Company is subject to the Regulations which has been complied with during the year. The Company has incorporated in its policies and procedures the necessary tests to ensure continuous and full compliance with these Regulations.

32 Capital risk management (continued)

The table below summarises the Minimum Capital Requirement, Minimum Guarantee Fund and Solvency Capital Requirement of the Company and the total capital held to meet these solvency margins as defined in the Regulations. The Company has disclosed the solvency position for the year ended as at 31 December 2023.

	31 December 2023 AED'000	31 December 2022 AED'000
Minimum Capital Requirement (MCR)	100,000	100,000
Solvency Capital Requirement (SCR)	29,415	41,170
Minimum Guarantee Fund (MGF)	22,723	25,692
Basic Own Funds	154,146	118,818
MCR Solvency Margin - Surplus	54,146	18,818
SCR Solvency Margin - Surplus	124,731	77,648
MGF Solvency Margin – Surplus	131,423	93,126

In accordance with Circular number CBUAE/BIS/2023/6163 of CBUAE dated 15 December 2023, the assets which are not in the Company's name should not be considered as admissible in regulatory statement of financial position. In the reported solvency figures as at 31 December 2023 AED Nil (2022: AED 6 million) as mentioned above, assets are not in the name of the Company and owned by a related party (refer to note 12).

Based on the Central Bank of UAE regulatory requirements, the minimum regulatory capital required is AED 100 million (31 December 2022: AED 100 million) against which the paid up capital of the Company is AED 154 million (31 December 2022: AED 154 million).

The Company and its individually regulated operations have complied with all externally imposed capital requirements throughout the year. There have been no changes in the Company's management of capital during the year.

33 Financial instruments

The Company is exposed to a range of financial risks through its financial assets, financial liabilities, retakaful assets and takaful liabilities. In particular, the key financial risk is that the in the long-term its investment proceeds are not sufficient to fund the obligations arising from its takaful contracts. The most important components of this financial risk are profit rate risk, equity price risk, foreign currency risk and credit risk.

These risks arise from open positions in profit rate, currency and equity products, all of which are exposed to general and specific market movements. The risks that the Company primarily faces due to the nature of its investments and financial liabilities are profit rate risk and equity price risk.

Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in note 3 to the financial statements.

Categories of financial instruments

		Restated

Total financial liabilities	158,609	131,647

Management considers that the carrying amounts of financial assets and financial liabilities recorded in the financial statements approximate their fair values.

34 Risk management

Takaful risk

The risk under any one takaful contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the nature of takaful contract, this risk is random and therefore unpredictable.

For a portfolio of takaful contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its takaful contracts is that the actual claims and benefit payments exceed the carrying amount of the takaful liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insured events are random, and the actual number and amount of claims and benefits will vary from year to year from the estimate established using statistical techniques.

Takaful risk (continued)

Experience shows that the larger the portfolio of similar takaful contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Company has developed its takaful underwriting strategy to diversify the type of takaful risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

The Company manages risks through its underwriting strategy, adequate retakaful arrangements and proactive claims handling. The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography. Underwriting limits are in place to enforce appropriate risk selection criteria.

Frequency and severity of claims

The Company has the right not to renew individual policies, re-price the risk, it can impose deductibles and it has the right to reject the payment of a fraudulent claim. Takaful contracts also entitle the Company to pursue third parties for payment of some or all costs (for example, subrogation).

Property takaful contracts are underwritten by reference to the commercial replacement value of the properties and contents insured and claim payment limits are always included to cap the amount payable on occurrence of the insured event. Cost of rebuilding properties, of replacement or indemnity for contents and time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies. Property takaful contracts are subdivided into four risk categories: fire, business interruption, weather damage and theft. The takaful risk arising from these contracts is not concentrated in any of the territories in which the Company operates, and there is a balance between commercial and personal properties in the overall portfolio of insured buildings.

The retakaful arrangements include excess and catastrophe coverage. The effect of such retakaful arrangements is that the Company should not suffer net takaful losses of a set limit of AED 500,000 (2022: AED 250,000) AED 30,000 (2022: AED 30,000) and AED 1,000,000 (2022: AED 500,000) in any one claim for motor, medical and other non-motor respectively. The Company has survey units dealing with the mitigation of risks surrounding claims. This unit investigates and recommends ways to improve risk claims. The risks are reviewed individually every year and adjusted to reflect the latest information on the underlying facts, current law, jurisdiction, contractual terms and conditions, and other factors. The Company actively manages and pursues early settlements of claims to reduce its exposure to unpredictable developments.

Sources of uncertainty in the estimation of future claim payments

Claims on takaful contracts are payable on a claims-occurrence basis. The Company is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and element of the claims provision includes incurred but not reported claims (IBNR). The estimation of IBNR is generally subject to a greater degree of uncertainty compared to the estimation of the cost of settling claims already notified to the Company, where information about the claim event is available. IBNR claims may not be apparent to the takaful company until many years after the event that gave rise to the claims. For some takaful contracts, the IBNR proportion of the total liability is high and will typically display greater variations between initial estimates and final outcomes because of the greater degree of difficulty of estimating these liabilities. In estimating the liability for the cost of reported claims not yet paid, the Company considers information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

Takaful risk (continued)

Sources of uncertainty in the estimation of future claim payments (continued)

The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and other recoveries. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established.

The amount of takaful claims is particularly sensitive to the level of court awards and to the development of legal precedent on matters of contract and tort. Takaful contracts are also subject to the emergence of new types of latent claims, but no allowance is included for this at the end of reporting period.

Where possible, the Company adopts multiple techniques to estimate the required level of provisions. This provides a greater understanding of the trends inherent in the experience being projected. The projections given by the various methodologies also assist in estimating the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

The initial loss-ratio estimate is an important assumption in the estimation technique and is based on previous years' experience, adjusted for factors such as premium rate changes, anticipated market experience and historical claims inflation. The initial estimate of the loss ratios used for the current year (before retakaful) are analysed below by type of risk where the insured operates for current and prior year contribution earned.

Type of risk

	2023	2022
Motor	226%	143%
Medical	101%	90%
General	16%	2%

Process used to decide on assumptions

The risks associated with these takaful contracts are complex and subject to a number of variables that complicate quantitative sensitivity analysis. Internal data is derived mostly from the Company's quarterly claims reports and screening of the actual takaful contracts carried out at the reporting date to derive data for the contracts held. The Company has reviewed the individual contracts and in particular the industries in which the insured companies operate and the actual exposure years of claims. This information is used to develop scenarios related to the latency of claims that are used for the projections of the ultimate number of claims.

The choice of selected results for each accident year of each class of business depends on an assessment of the technique that has been most appropriate to observed historical developments. In certain instances, this has meant that different techniques or combinations of techniques have been selected for individual accident years or groups of accident years within the same class of business.

Concentration of risks

The takaful risk arising from takaful contracts is concentrated mainly in the United Arab Emirates.

The table on next page sets out the concentration of contract liabilities by type of contract:

022.2

Retakaful risk

In common with other takaful companies, in order to minimise financial exposure arising from large takaful claims, the Company, in the normal course of business, enters into arrangement with other parties for retakaful purposes.

To minimise its exposure to significant losses from retakaful insolvencies, the Company evaluates the financial condition of its retakaful companies and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the retakaful. Retakaful ceded contracts do not relieve the Company from its obligations to participants. The Company remains liable to its participants for the portion reinsured to the extent that any reinsurer does not meet the obligations assumed under the retakaful agreements.

Sensitivities

The liability for incurred claims is sensitive to the key assumptions in the table below. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process. The following sensitivity analysis shows the impact on gross and net liabilities, net profit and equity for reasonably possible movements in key assumptions with all other assumptions held constant.

The correlation of assumptions will have a significant effect in determining the ultimate impacts, but to demonstrate the impact due to changes in each assumption, assumptions had to be changed on an individual basis.

It should be noted that movements in these assumptions are non-linear. The method used for deriving sensitivity information and significant assumptions did not change from the previous period.

Financial risk

Market risk

The Company's activities expose it primarily to the financial risks of changes in foreign currency exchange rates, profit rates and equity price risk.

Foreign currency risk

There are no significant exchange rate risks as substantially all financial assets and financial liabilities are denominated in Arab Emirates Dirhams, other G.C.C. currencies or US Dollars to which the Dirham is fixed.

Credit risk

Credit risk refers to the risk that a counter party will default on its contractual obligations resulting in financial loss to the Company.

Financial risk (continued)

Credit risk (continued)

Key areas where the Company is exposed to credit risk are:

- retakaful' share of takaful liabilities;
- amounts due from retakaful in respect of claims already paid;
- amounts due from takaful contract holders; and
- amounts due from takaful intermediaries.

The Company has adopted a policy of dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults. The Company's exposure and the credit ratings of its counterparties are continuously monitored, and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the management annually.

Retakaful is used to manage takaful risk. This does not, however, discharge the Company's liability as primary policyholder. If a retakaful fails to pay a claim for any reason, the Company remains liable for the payment to the policyholder. The creditworthiness of retakaful company is considered on an annual basis by reviewing their financial strength prior to finalisation of any contract.

The Company maintains records of the payment history for significant contract holders with whom it conducts regular business. The exposure to individual counterparties is also managed by other mechanisms, such as the right of offset where counterparties are both debtors and creditors of the Company. Management information reported to the management includes details of provisions for impairment on takaful receivables and subsequent write-offs. Exposures to individual participants and groups of participants are collected within the ongoing monitoring of the controls. Where there exists significant exposure to individual participants, or homogenous groups of participants, a financial analysis equivalent to that conducted for retakaful is carried out by the Company.

Takaful receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of takaful receivable.

The Company does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristic, other than takaful receivables at the end of reporting period. The Company defines counterparties as having similar characteristics if they are related entities. Concentration of credit risk did not exceed 10% of gross monetary assets at any time during the year. The credit risk on liquid funds is limited because the counterparties are banks registered in the United Arab Emirates.

The carrying amount of financial assets recorded in the financial statements, which is net of impairment losses, represents the Company's maximum exposure to credit risk.

Liquidity risk

Ultimate responsibility for liquidity risk management rests with management, which has built an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table on next page summarises the maturity profile of the Company's financial instruments. The contractual maturities of the financial instruments have been determined on the basis of the remaining period at the end of the reporting period to the contractual maturity date. The maturity profile is monitored by management to ensure adequate liquidity is maintained.

Financial risk (continued)

Liquidity tisk

The maturity profile of the financial assets and financial liabilities at the reporting date based on contractual repayment arrangements is given below:

90 days AED'000	91-180 days AED'000	181-365 days AED'000	Above 365 days AED'000	Total AED'000

Equity price risk

Sensitivity analysis

At the reporting date if the equity prices are 10% higher/lower as per the assumptions mentioned below and all the other variables were held constant the Company's statement of income/comprehensive income would have increased/decreased by AED 0.95 million (2022: AED 1.6 million).

Method and assumptions for sensitivity analysis

The sensitivity analysis has been done based on the exposure to equity price risk as at the end of the reporting period.

- As at the reporting date if equity prices are 10% higher/lower on the market value uniformly for all equities while all other variables are held constant, the impact on statement of income and other comprehensive income has been shown above.
- A 10% change in equity prices has been used to give a realistic assessment as a plausible event.

35 Fair value measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, differences can arise between book values and the fair value estimates. Underlying the definition of fair value is the presumption that the Company is a going concern without any intention or requirement to materially curtail the scale of its operation or to undertake a transaction on adverse terms.

Fair value of financial instruments carried at amortised cost

Management considers that the carrying amounts of financial assets and financial liabilities recognised at amortised cost in the financial statements approximate their fair values.

Valuation techniques and assumptions applied for the purposes of measuring fair value

The fair values of financial assets and financial liabilities are determined using similar valuation techniques and assumptions as used in the audited annual financial statements for the year ended 31 December 2022.

Fair value measurements recognised in the statement of financial position

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

-	Fair valu	ie as at	_			Relationship
Financial assets	2023 AED'000	2022 AED'000	Fair value hierarchy	Valuation techniques and key inputs	Significant unobservable input	of unobservable inputs to fair value
Financial assets at FVTOCI	, , , , , , , , , , , , , , , , , , ,					
Unquoted equity securities	8,698	9,559	Level 3	Net assets valuation method	Net assets value	Higher the net assets value of investees, higher the fair value.
Unquoted equity securities	247	1,939	Level 3	Multiple base approach	Relative value	Higher the multiple based value of investees, higher the fair value.
Quoted debt Securities	21,293	56,946	Level 1	Quoted bid prices in an active market.	None	N/A

35 Fair value	measureme r Fair valu	ACCURATE AND ADDRESS AND ADDRESS ADDRESS	ued)			Relationship
Financial assets	2023 AED'000		Fair value hierarchy	Valuation techniques and key inputs	Significant unobservable input	of unobservable inputs to fair value
Financial assets at FVTPL			*	••••••••••••••••		
Quoted equity Securities	-	3,538	Level 1	Quoted bid prices in an active market.	None	N/A
Unquoted equity Securities	557	515	Level 3	Net assets valuation method	Net assets value	Higher the net assets value of investees, higher the fair value.

There were no transfers between each of level during the year. There are no financial liabilities which should be measured at fair value and accordingly no disclosure is made in the above table.

36 Contingent liabilities

	2023 AED'000	2022 AED'000
Letters of guarantees	10,421	10,421

The Company is subject to litigation in the normal course of its business. Although the ultimate outcome of these claims cannot presently be determined, adequate provisions have been made for any liability that may result, based on management's best estimates.

37 Corporate Tax

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree Law No. 47 of 2022 on the Taxation of Corporations and Businesses (the Law) to enact a Federal Corporate Tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023.

The Cabinet of Ministers Decision No. 116/2022 effective from 2023, specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000.

For the Company, current taxes shall be accounted for as appropriate in the financial statements for the period beginning 1 January 2024. In accordance with IAS 12 income Taxes, the Company has assessed the deferred tax implications for the year ended 31 December 2023 and, after considering its interpretations of applicable tax law, official pronouncements, cabinet decisions and ministerial decisions (especially with regard to transition rules), it has been concluded that it is not material.

38 Internal Sharia Supervisory Committee

The Company's business activities are subject to the supervision of its Internal Sharia Supervision Committee (ISSC) consisting of three members appointed by the shareholders. ISSC performs a supervisory role in order to determine whether the operations of the Company are conducted in accordance with Sharia rules and principles.

According to the Internal Sharia Supervision Committee, the Company is required to identify any income deemed to be derived from transactions not acceptable under Islamic Sharia rules and principles, as interpreted by Internal Sharia Supervision Committee, and to set aside such amount in a separate account for Shareholders who may resolve to pay the same for local charitable causes and activities.

39 Post-reporting date events

No adjusting or significant non-adjusting events have occurred between the reporting date and the date of authorisation of these financial statements.
